Short media description

On 20 October 2026, Toplocentrala in Sofia will host the debut show of KECH: Unlimited — a Bulgarian production featuring live professional wrestling matches, characters and stories unfolding in front of the audience.

What is professional wrestling?

A brief explanation for media and partners who do not regularly cover professional wrestling.

Professional wrestling is a live sports-entertainment performance in which participants compete physically in a ring while portraying characters in ongoing stories.

Matches follow a pre-planned dramatic direction, but the physical performance, falls, jumps and much of the interaction happen live.

01

ATHLETICISM

Physical conditioning, coordination, strength and acrobatic elements, and risk control.

02

CHARACTERS & STORIES

Conflicts, motivations, comedy, tension and development between matches.

03

LIVE AUDIENCE

Cheers, boos and chants directly influence the pace and atmosphere.

The audience is not a passive observer. That is why two performances of the same idea never play out exactly the same way.
